

W6 Auth Flow Screenshots

Intern ID: 26100280

Registration Form

Create a new account

The screenshot shows a dark-themed interface for the StaySense AI Auth Flow Demo. At the top left is the text 'StaySense AI' and at the top right is 'Auth Flow Demo'. The main content area is a rounded rectangle with a dark background. Inside, there is a green header bar with the text 'Registration Form' in white. Below this bar, the text 'Create a new account' is displayed. The form fields are as follows: 'Email: intern@example.com', 'Password: ****', 'POST /api/auth/register', and 'Status: 201 Created'. Below these fields is a rounded rectangle with a dark background, containing the text 'Response' in green, followed by the JSON response: '{"success": true, "token": "jwt-token", "user": {"email": "intern@example.com"}}'.

Email: intern@example.com

Password: ****

POST /api/auth/register

Status: 201 Created

Response: {"success": true, "token": "jwt-token", "user": {"email": "intern@example.com"}}

Login Form

Sign in with email and password

Login Form

Sign in with email and password

Email: intern@example.com

Password: *****

POST /api/auth/login

Status: 200 OK

Response

```
{"success": true, "token": "eyJhbGciOi...", "user": {"email": "intern@example.com"}}
```

Email: intern@example.com

Password: *****

POST /api/auth/login

Status: 200 OK

Response: {"success": true, "token": "eyJhbGciOi...", "user": {"email": "intern@example.com"}}

Protected Route Access

Dashboard requires authentication

Protected Route Access

Dashboard requires authentication

Visit /dashboard without a token

Redirect to /login

Status: 401 Unauthorized

Response

Location: /login

Visit /dashboard without a token
